SUMMARY

Software Developer with hands-on experience in developing production-grade backend systems using Golang, Python, and cloud technologies. Currently working at PT Super PARI, contributing to scalable application development with microservice architecture and integrations with partners like POS Indonesia and BRI. Actively sharpening skills through projects, team collaboration, and continuous learning.

WORK EXPERIENCES

PT. Super Pasar Rakyat Indonesia - Jakarta Pusat, Jakarta

Backend Developer

Oct 2024 - Now

- Developed and maintained the backend of the Localoka application, which has over 100,000 active users, using a microservices architecture with Python Flask, and built the backend of Localoka V2 using Golang with a microservices architecture.
- Resolved critical bugs such as failed coin withdrawal, shipment tracking errors, and others
- Implemented new features such as branch store management, flash withdrawal, and branch store withdrawal to support multi-location operations
- Integrated Indonesia POS shipping API as a delivery method within the Localoka application
- Fixed and implemented an integrated CI/CD pipeline with Docker to streamline the deployment process
- Acted as Scrum Master, managing sprint planning, task allocation, and progress monitoring of the Localoka development team

PT. Sekawan Media Informatika - Malang, Jawa Timur

Full Stack Developer

Oct 2023 - Mar 2024

- Developed the Zavis Voucher information system using Laravel and MySQL, and the HRIS information system using Next.js/React.js, Laravel, and MySQL
- Performed several enhancements, including backend refactoring, layout improvements, and adding new components and pages to both the Zavis Voucher and HRIS information systems

CV. Naistudio - Metro, Lampung

Student Trainee

Nov 2019 - Dec 2019

- Built an event information system using Vue.js, Laravel, and MySQL
 - Developed a tourism information website using WordPress
 - Created Othello, Snake and Jewelry games using HTML, and JavaScript Canvas
 - Completed small challenges such as building a Captcha, creating a Rubik's Cube with CSS and HTML, generating grayscale images with PHP GD, and more
-

EDUCATIONS

Politeknik Negeri Lhokseumawe - Lhokseumawe, Aceh

Teknologi Rekayasa Komputer Jaringan - GPA 3.72 / 4.0

Sep 2020 - Oct 2024

- Completed a final project titled *"Implementation of Document Storage Using Google Cloud Storage in the Vocaject Application"*
- Served as Chairman of the student organization *Polytechnic Linux Community (UKM POLICY)* for the 2022–2023 period
- Achieved 3rd place in the Hackathon category at the 5th National Informatics Student Competition (2023) with the Vocaject application, built using Laravel, Vue, Flutter, and MySQL, in a team of three where I served as Full Stack Developer and Team Leader
- Participated in the *Studi Independent* program under Bangkit Academy led by Google, Goto, and Traveloka
- Led a team as Project Manager to build a semester project, the *Pos Kopi* application, using Flutter, Vue.js, Laravel, and MySQL
- Developed the official website of UKM POLICY for portfolio and organizational management purposes using Laravel and MySQL

Bangkit Academy's - Remote

Learning Path for Cloud Computing - GPA 80.6 / 100.0

Feb 2023 - Agu 2023

- Completed and ranked in the Top 68 Capstone Projects with the *Arahku* application, built using Flask, Flutter, MySQL, and several Google Cloud Platform services
- Successfully completed various Cloud Computing learning courses on platforms such as Dicoding, Google Cloud Skill Boost, and Coursera

TECHNICAL SKILLS

Hard Skills

Backend Development (RESTful API, Microservices), Frontend Development (Responsive Web), Fullstack Web Development, CI/CD Implementation, Cloud Computing (GCP, AWS), Project Management (Agile/Scrum), Database Design (SQL, NoSQL)

Programming Languages / Frameworks

Golang, Python, JavaScript, PHP, Gin, Flask, FastAPI, Express.js, Nest.js, Vue.js, React.js, Laravel, Codeigniter

Software Tools

Docker, Git, Postman, MySQL, PostgreSQL, MongoDB, Firebase, Redis, Rabbit MQ, Visual Studio Code, NodeJs

ACHIEVEMENTS / AWARDS

3rd place in the Hackathon category in the National Polytechnic Informatics Student Competency event.

Agu 2023

Medallion of Excellence in the Web Technologies category at the National Level Student Competency Competition.

Oct 2020

1st Place in the Web Design Category, Aceh Province Student Competency Competition.

Sep 2019
